Summary

Software Developer with production experience building iOS, web, and AI applications using SwiftUI, React, Python, and Firebase. Founded KwikCut (VIT-TBI backed) - a salon booking platform with iOS app and web dashboard. Built offline AI voice assistant with LLM integration and real-time system automation. Seeking Software Engineering / AI / Full Stack roles.

Skills

Languages: Java, C++, C, Python, Swift, JavaScript
Frameworks & Tools: SwiftUI, React, Electron, Firebase, Node.js, Git
AI & ML: LLMs (Qwen 2.5), Whisper, Vosk, Prompt Engineering
Databases: Firebase, MySQL, MongoDB
Core CS: DSA, OOP, System Design, Multi-threading

Experience

Founder – KwikCut   **October 2024 – September 2025**
Salon Booking Platform   *SwiftUI, Firebase, React*

- Built an iOS app from scratch with login, booking history, cancellations, and push notifications using Swift and Firebase
- Created a web dashboard for salon owners to manage appointments, customer data, and schedules in real-time
- Designed the database structure, authentication system, and end-to-end product architecture from concept to deployment
- Worked with a small team of 4 interns (design, development, marketing) - did code reviews and helped them learn
- Got selected for VIT-TBI's pre-incubation program which provided mentorship and some initial support

Projects

Daily AI Companion [KwikLyze] | *Electron, Python, React, JavaScript, Qwen 2.5(LLM)*   **January 2026**

- **Built local-first voice assistant** using Electron, React, and Python with IPC-based architecture enabling 200ms voice-to-action latency for privacy-first automation workflows.
- **Integrated offline AI pipeline** combining **Whisper (STT)**, **Vosk (wake-word detection)**, and **Qwen LLM** achieving sub-second response times for natural language commands without cloud dependency.
- **Enabled natural-language driven system and application control** through conversational voice commands and task execution.
- **Developed task orchestration and routine scheduling** with proactive productivity tracking and structured data logging.

KwikVerse Web Platform Suite | *React, JavaScript, Firebase, Web APIs*   **2024 – 2025**

- **Designed and developed multiple production-ready PWA web applications** including **KwikCut (booking), KwikPDF (PDF tools), KwikWall (wallpapers), KwikFry (digital menus), and KwikMusic (music streaming)**.
- **Built responsive full-stack web apps** with real-time data handling, authentication, and cloud-backed storage using Firebase services.
- **Implemented feature-specific workflows** such as appointment booking, PDF utilities, media streaming, digital menu systems, and visual content platforms.

Certifications & Achievements

- **Google AI Instructor Certificate:** Earned certification demonstrating AI fundamentals, tools and instructional competency
- **Cent Percent Attendance – 2023, VIT University:** Honored for perfect attendance and academic commitment

Education

B.Tech in Computer Science and Engineering (CSE)   **Expected Graduation: 2027**
Vellore Institute of Technology, Vellore   *CGPA: 8.28 / 10*
